Cover Letter

Dear Recruiter,

I am submitting herewith my resume for your perusal and consideration for the post of <THE POST> in your organisation.

I am qualified individual pursuing Master's of Science in Computer Science from Central Michigan University, working in Technology Operations in Mount Pleasant, MI; offering more than 3 years experience as Software Developer. Understanding of underlying concepts and principles of software engineering with experience in designing backend process based on python and working at QuadNox made me understand the process based on java technology and Adobe Platform enabled me to adapt & undertake varied project and organisational requirements. Working with ARMAN welfare society was a great experience for me as I was directly involved to work for society.

I am seeking a challenging job that would synergies my technical skills and knowledge with the objectives of the organisation. Being a dedicated and focused individual, I am determined to add value to the organisation I work for, through my technical knowledge and learning ability.

To describe myself in a nutshell, I am systematic, organised and hardworking; ready to take up any challenge of life abreast with the latest trends and with good communication skills.

My basic objective is to hone skills for comprehensive personality development and be an epitome of trust and reliability in the corporate world. My prime goal is to understand professional environment and capitalise on opportunities.

Being an enthusiastic and competent individual, I am confident of making visible contribution for the growth of the organisation.

I'd appreciate the chance to meet your requirements and discuss with you as to how I could be vital part of your organisation.

Sincerely yours,  
Amninder Singh Narota
